

ORANGE COUNTY LAW & JUSTICE SYSTEM MEMORANDUM OF AGREEMENT

The parties to this Memorandum agree to work cooperatively to establish a seamless integrated system of information technology and services that maximizes the standardization of data and communications technology among the primary community of interest: law enforcement, district attorneys, state-funded courts, and state-funded adult and youth corrections. In addition, the parties agree to work in a variety of ways to facilitate sharing each other's data in an effort to improve the effectiveness of their respective agency and collectively, the entire Orange County Criminal Justice System.

Specifically, the parties to this memorandum agree to work toward establishing a system and/or processes which will:

1. Provide criminal justice practitioners who have a need and right to know, with comprehensive, timely and accurate information about a suspect or offender to include identity, criminal history and current justice status.
2. Allow criminal justice practitioners to maintain legacy databases and share only information that has been agreed upon in advance.
3. Reduce redundant document preparation, data entry, transmission, and storage.
4. Strive to identify and achieve common interests to enhance public safety and due process.
5. Maintain individual privacy rights and promote appropriate access controls and security.
6. Support the development of effective criminal justice policy in keeping with the objectives of this project.
7. Strive for the compatibility of automated systems and processes among the various components of the Orange County Criminal Justice System.
8. Acknowledge that each participating agency is responsible for internal agency security for their records, technical support, etc.

9. Recognize that in order to achieve overall success, resources (personnel, software, hardware, etc.), must be shared willingly and in some cases unequally, as long as that cooperation does not adversely impact the mission of the sharing agency.
10. Form a steering committee comprised of the heads of the agencies that are a party to this agreement. Based upon the importance of the policy implications and financial commitments which may result from the efforts undertaken, those individuals agree to personally meet at least quarterly (or more often if necessary), to review the progress made and to refocus the steering committee's energy as appropriate.
11. Appoint an alternate to the group who has the authority of the agency head to make decisions in their absence in furtherance of the goals of integrating the automation systems of those agencies serving the Criminal Justice System in Orange County. The appointed alternates are encouraged to attend all of the scheduled meetings; however, they shall attend those sessions, which are in addition to the quarterly participation requirement of the agency head.
12. Provide regular project updates to their respective agency staff and managers, to ensure the agency's goals remain consistent with those of this steering committee. Work with other members of the group to create opportunities to provide those same updates to all Orange County Law & Justice agencies not represented on the Steering Committee.
13. Work together to develop a formal, long-term strategic plan to achieve a more fully integrated justice system through the information sharing which will occur as a result of this collaborative effort.
14. Identify short-term goals and strategies to demonstrate successes at information sharing, which will reinforce the value of this project.
15. During this interim period while the strategic planning process is underway, commit to only considering the purchase of information systems, which have as a predominate feature, an open architecture, so as to facilitate the kind of information sharing opportunities which are consistent with the goals of this agreement.
16. Agree to look for and pursue creative funding opportunities to accomplish the strategic planning process, and to form more specific consortiums if it appears such a vehicle is necessary in order to attract State or Federal funding for the project.

17. Amend this agreement as necessary to accomplish the goal of more fully integrating the automation and processes, which serve the Orange County Criminal Justice System.
18. Consider drafting a Charter for the committee when appropriate, to include resolving the definition of a quorum (for voting purposes), limiting the size of the committee for efficiency's sake, and identifying the limitations of the Committee Chair's ability to exercise signatory authority, commit funds, etc.
