

## APPROVED PROJECTS FOR MEASURE M2 FUNDING

### **Harbor Boulevard – Adams Avenue:**

This project includes addition of a third eastbound and second southbound right-turn at the above intersection. These improvements were developed in the preliminary design stage and are now in the final design phase. The design phase was funded by the Orange County Transportation Authority's (OCTA) original Measure "M" program. The improvements were identified in the Memorandum of Understanding (MOU) between the Cities of Costa Mesa, Fountain Valley, Huntington Beach, and Orange County Transportation Authority for the Garfield/Gisler Bridge over the Santa Ana River. Funding was approved for right-of-way and construction phases of the project.

### **Harbor Boulevard – Wilson Street:**

This project provides a westbound, right-turn lane from westbound Wilson Street to northbound Harbor Boulevard. Funding was approved for the construction phase of the project.

### **Fairview Road – Wilson Street:**

This project includes widening of Wilson Street at Fairview Road to the Master Plan of Highways (MPH) designated standards. Funding was approved for the design phase.

### **Baker Street - Bear Street:**

This project will provide a third westbound through lane on Baker Street at the Bear Street intersection and includes traffic signal improvements at this location. Funding was approved for the construction phase of the project.

### **Harbor Boulevard (Law Court to Sunflower Avenue):**

This project will add a fourth northbound lane on Harbor Boulevard between Law Court and Sunflower Avenue. At Sunflower Avenue, the fourth northbound lane will turn into a right-turn lane to eastbound Sunflower Avenue per the City's General Plan. Funding was approved for the right-of-way and construction phases of the project.

### **Harbor Boulevard – Victoria Street:**

This project widens the west leg of the intersection in order to provide a right-turn lane from eastbound Victoria Street to southbound Harbor Boulevard. Funding was approved for the design phase of the project.

### **Bristol Street – Baker Street:**

This project consists of design of General Plan improvements at the Bristol Street - Baker Street intersection. These include eastbound through and right-turn lanes, and a westbound through lane.

### **Harbor Boulevard – Gisler Avenue:**

This project consists of design of General Plan improvements at Harbor Boulevard – Gisler Avenue which includes a southbound right-turn lane. In addition, the project will also consider other improvement options for eastbound Gisler Avenue to improve the access to the I-405 Freeway and northbound Harbor Boulevard.
