

PROJECT V City of Costa Mesa Transit Circulator Project

The current transit demonstration program providing daily scheduled bus service between City of Costa Mesa and City of Anaheim provides the basis for this proposed Transit Circulator Project operation.

Inter-city Service:

Currently, ART Route #22, “Costa Mesa/South Coast Plaza Line”, connects various hotels and the South Coast Plaza shopping center in the City of Costa Mesa with scheduled daily service to and from the Anaheim Resort Area including Disneyland, the Anaheim Regional Transportation Intermodal Center (ARTIC) and various Anaheim area hotels (see Route Maps below). Eight bus stops are located within the Anaheim Resort Area and twelve stops are located within Costa Mesa (see Stop Location Table below). The 12 stops within Costa Mesa are proposed to be maintained with this new transit service. Stops within the Anaheim Resort area will be reduced to six with this current proposal. The currently scheduled arrivals and departures during the morning and afternoon/evening periods will be maintained and the current on-demand schedule for the Costa Mesa hotels will be changed to a fixed schedule. One bus/shuttle is expected to serve the Costa Mesa-Anaheim Route 22 with approximately 105 minute headways. The transit service route will operate on a daily basis year-round with additional service provided on summer weekends and Holidays on Route 22 when Disneyland Park closes at midnight. Bus/shuttle service will operate along this route for three hours in the morning (8:30 a.m. to 11:30 a.m.) and five hours in the evening (6:00 p.m. to 11:00 p.m.).

Local Service:

A new mid-day fixed schedule and route with five new stops is proposed to provide local transit service between the Lab/Camp shopping area and the South Coast Plaza shopping center area. Two buses are planned for this route with approximate 15 minute headways. This transit service route will operate on a daily basis year-round. Bus/shuttle service will be operated along this route for four hours during mid-day (10:30 a.m. to 2:30 p.m.)
