In general, the parks in District #1 are in great condition, with the ballfields in excellent shape. I want to thank staff for the fine work that they have done through tough times with the drought and extreme heat, as well as implementing roto-tilling sand play areas throughout the district. Moving forward, I'd like to see:

- Bike racks in most parks, as mentioned before.
- An update on implementing a deposit for park rentals.
- New covered trash cans at some sites, are we beginning the process to replace the old oil barrels?
- A greater use of fitness courses, similar to those seen at Wimbledon Park, would be a great addition throughout the City.
- Monument signs – would be a good addition to all the parks in the district.
- A greater number of barbecues in the parks.
