Sandy Genis, Costa Mesa Mayor
Cynthia D'Agosta, Fairview Park Administrator
Anna Vrska, Fairview Park Steering Committee Chair

Dear Sandy, Cynthia and Anna,

At the most recent meeting of the Fairview Park Alliance, the board came to the conclusion that the top priority for Fairview Park is to have a comprehensive scientific restoration plan developed for the park by someone with the proper credentials and experience in native plant and grassland restoration. We need a formal plan that correlates with the Fairview Park Master Plan.

We would like to recommend Mr. Travis Brooks and Land IQ for this position. Mr. Brooks is a native plant restoration specialist with a history of successes.

FPA would also like to recommend that the new Placentia Ave. center medians adjacent to Fairview Park should not have trees but rather use a plant palette native to the park. The medians adjacent to Estancia and the homes could still have trees however trees don't do well in the park and likely will not do well in the medians.

Sincerely,

Richard J. Mehren, M.D.
President
Fairview Park Alliance
