

## Directory of the Arts

### Don Murray

Photography

**Don Murray** was a photographer since he was a teen working for a small, local mid-west paper. Don Murray has spent the past two years exploring the latest technology in photography - the smartphone camera. Armed with only a smartphone, Don continually pushes the boundaries of phone photography and shares with others the ease in which ANYONE can easily transition from using their phones for snapshots, to creating artistic images with the simple push of a button. ALL of the photos he displays in exhibits and online have been captured using a phone.
