

## LEGAL BAT LIST

Updated 12/7/09

- ❖ **Note:** A single-wall bat is a bat that has a *hitting surface* composed of one continuous, single shell or layer composed entirely of the same material without the use of any type of glue or bonding system. Any bat that is more complicated than this definition is considered a multi-wall bat. All current composite bats are considered Multi-Wall bats since they are constructed using multiple layers.
- ❖ Bats are considered illegal based on several categories, which include but are not limited to: multiple wall or similar construction, exceed 1.20 bpf, contain titanium, or pose a potential significant risk for injury.
- ❖ Umpires shall have final authority to rule on bat eligibility during games.
